Treasure Maze – Admin Guide

**Description:** Students select pathways through mazes based on certain criteria. They then reflect on the strategies used.

**Level:** 1 – 2

**Skills Addressed:**

<table>
<thead>
<tr>
<th>Q</th>
<th>Question Type</th>
<th>Skill addressed</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Analysing</td>
<td>recognise a problem and explore possible pathways for reaching a conclusion NOT Scored Practice only</td>
</tr>
<tr>
<td>2</td>
<td>Reflecting</td>
<td>with support, identify and describe thinking and learning strategies they have used</td>
</tr>
<tr>
<td>3</td>
<td>Inquiring</td>
<td>use relevant information from a previous experience to inform a new experience</td>
</tr>
<tr>
<td>4</td>
<td>Reflecting</td>
<td>reflect on whether they have accomplished what they set out to do</td>
</tr>
<tr>
<td>5</td>
<td>Generating</td>
<td>consider alternative actions to given situations</td>
</tr>
</tbody>
</table>

**Duration:** Approximately 20 minutes

**Teacher Preparation:**

Teachers should have already assigned this task to the individual student.

It is recommended that teachers go through the entire task on the computer before administering to the students.

Ensure all students have:

- individual student log on and password
- access to an individual computer/tablet
- a set of headphones

**Please note:**

Students should complete the task independently. The task should be administered in a quiet environment.

No talking between students is allowed until all students have completed the task.

Difficult or unfamiliar words may be explained or read out to students, but teachers should not prompt students with answers.
This is not a timed task. Students may require more time to complete the task depending on the individual.

**Instructions to complete the task:**

1) **Introduce the task**

Have a brief conversation about mazes and ensure that the student is aware of how a maze ‘works’, i.e. finding a pathway from start to finish.

2) **Accessing the task**

Help students to log onto the Student log on page using their individual login details and passwords.

The Treasure Maze assessment task will automatically open on the student’s computer. Only those students who have been assigned this task will be able to see the content.

3) **Support students to complete the task**

Ask students to click on the NEXT button and read the information aloud to them.

Students can proceed to individually answer the questions in this task.

Teachers should not help students with the thinking.

Teachers can help students with reading the questions and information, typing their answers (scribing) and using a computer.

4) **Submitting the task**

Explicitly instruct the students to click the submit button after completing the task.

**Marking the task:**

Teachers will need to go back to the Teacher page to mark the task online.

The questions that do not require students to type their answers, such as multiple choice or drag and drop, will be automatically marked.

The teacher will need to use the online rubric to mark the remaining answers, such as free writing responses.
